Executive Summary

Arcadia was engaged to do an audit and code review of Ferrum Network's ERC-20 which can be found at the Ethereum Address "0xe5caef4af8780e59df925470b050fb23c43ca68c".

This ERC-20 Contract is a direct import of the OpenZeppelin Smart Contract Template with no modification or module add-ons. As such the smart contract is not only in full compliance with the latest version of the ERC-20 EIP but also the recommended deployment methods as defined by OpenZeppelin. There were no security findings.

The OpenZeppelin implementation of the ERC-20 contract has been audited a plethora of times both directly and by proxy which can be found [here](https://github.com/OpenZeppelin/openzeppelin-contracts/tree/master/audit)[1]

Disclaimer

While best efforts and precautions have been taken in the preparation of this document, The Arcadia Group and the Authors assume no responsibility for errors, omissions, or damages resulting from the use of the provided information. Additionally, Arcadia would like to emphasize that the use of Arcadia's services does not guarantee the security of a smart contract or set of smart contracts and does not guarantee against attacks. One audit on its own is not enough for a project to be considered secure; that categorization can only be earned through extensive peer review and battle testing over an extended period.

Document Information

Title	ERC-20 Review
Client	Ferrum Network
Auditor(s)	Rasikh Morani
Contact Details	Rasikh Morani (972) 543-3886 rasikh@arcadiamgroup.com https://t.me/thearcadiagroup
